

### Customize Your DDACTS Workshop: Cost Options for HSOs and Law Enforcement Agencies as of 2016

- **Option 1:** The most proven workshop with the best results is the half-day, full-day, half-day format with three subject matter experts (SMEs), a commander, a supervisor, and an analyst. The cost below is just for the workshop with no technical assistance follow-up.
  - **Cost: \$7,458, plus travel and per-diem for three SMEs. Includes all workbooks (guiding principles).**
- **Option 2:** A two-day workshop—not as effective for agencies that face more difficulty adopting principles because of inadequate time spent developing implementation plans.
  - **Cost: \$6,318, plus travel and per-diem for three SMEs. Includes all workbooks.**
- **Option 3:** A scaled-down workshop—only two SMEs. One commander and one analyst are sent for two days.
  - **Cost: \$4,838, plus travel and per-diem for two SME's. Includes all workbooks.**
  - **Note: Technical follow-up is \$50 per hour, plus any required travel. Most can be done remotely.**
- **Alternative DDACTS workshop proposal:** Sometimes a single, large agency would like to train only their own people for one day in implementing DDACTS. This would involve sending in two SMEs (one commander and one analyst) and providing an 8-hour class for a single agency.
  - **Cost: \$2,752, plus travel for two SMEs. Includes 40 workbooks; if fewer people, deduct \$20 per workbook per student from this cost.**
